Assignment 3: A Special Place

Where is it?

Fulton Center is located in lower Manhattan, on Broadway and Fulton St.

When is the first time you were there?

Fulton Center was opened November 10, 2014, I went to see it 6 months after it was open to the public.

What is special/meaningful about it?

It's a meeting up point where I wait for friends also I commute from there as well.

Why should other people visit it?

It's a transportation hub for the subway trains and there are lots of places inside to eat at such as Dunkin' Donuts and Shake Shack. And the structure of the building is amazing beautiful to look at.

Is there anything they need to know or prepare to go there? What's the best way to get there?

It gets crowded and waves of crowds constantly passes through there so you have to be aware of your surroundings. And all subway lines stop the fulton center.
